

## PowerSorter - Let all your Music to be in Ideal Order!

PowerSorter - is a full automatic mp3 music organizer, that will sort, organize and rename all your Music files, fast and easy. Support variety of music formats: MP3, OGG, WMA, AC3, WAV and HUNDREDS other media formats. It will sort, organize, rename all your music, even if it is packed in ZIP and RAR archives. No more files with names like "mp3s.rar" or "audio27.mp3" - Ideal MP3 Music Sorter will rename all such files according to their content and move to appropriate folder. And even more - all options may be changed by your choice. Ideal MP3 Music Sorter will organize your music of any type - PowerSorter is organizing music and other files with any content -

- MP3 Music of all types (idv2, idv3, idv4, etc.)
- MP3 Music in ZIP/RAR archives (zip, rar, etc.)
- Music of other types (mp, ogg, mpa, wma, etc.)
- Video records (mp4, divx, avi, wmv, etc.)
- Images (jpg, png, tif, wmf, bmp, etc.)
- Text documents (doc, rtf, pdf, htm, etc.)
- Programs installation packs (exe, msi, bin, com, etc.)
- Archives and all files in archives (zip, rar, etc.)
- Files of any other types (over powerful artificial intelligence-based mechanism)

PowerSorter supports hundreds of media formats, even if they are packed in archives. While files processing, you will see all, that is happening, even content of archives, that are processed now. And even more - you can on the fly do with files, that were appended to databases all, that you want - copy, cut, delete or move to another location. How it work - Examples That's how PowerSorter organize files over renaming and moving to folders, according to file content: File content type Original file name and address File name and address after processing by PowerSorter

- Audio

"new folder\

track14.mp3" "Audio\Instrumental\Vanessa Mae\The Classical Collection\Folk Tune.mp3";

- Software "progs\st25.exe" "Programs\Adobe Systems Inc\Adobe Acrobat Professional\v4.1\2004.12.1 9-23\Setup.exe";
- Text "texts\doc46.pdf" "Bill Morris\2007\February\Monthly report.doc";
- Images "photos\5486.jpg" "Images\Black and white\Drawing\800x600\Artificial intelligence.jpg"
- Archives "arch\4216.rar" "Archives\September 2009\Arcade Novologic game v.6.4.rar" That's what people say about such PowerSorter possibilities: "I had never seen such powerful file organizing tool; we had thousands of documents on our servers and PowerSorter organized them all, without any human interoperation. If i opened each document, find out it's content and manually rename it and move it to appropriate folder (different to each file), I needed years of hard work. But PowerSorter had done all job for me - it's look like a miracle!" David Lloid, Scientific Atlanta, Inc. Chief engineer

### Our mission

Today life is impossible to imagine without information, and information - without files. By reports, provided by independent researches, now more than 95% of information is stored in files.

In 1970's, when first floppy disk was invented, it had 0,1 Megabyte size and often hold up to 15 files. In 1980's was invented CD disk, that already had 500 Megabyte size and could hold already thousands of files. In 1990's became popular DVD disks, that could carry already dozens of thousands of files. Today most of files are stored on HDD (Hard Disk Drives), that are presented in every computer. They have size beginning from 80 000 Megabyte and hold millions of documents.

Several weeks ago was already started production of Hard disk with 470 000 Megabytes size, that is able to store already milliards of documents in variety of formats.

When on a computer are stored such variety of files, especially if they are packed in numerous of archives, it is extremely hard to navigate between them. People often don't know, what files and where are stored.

When in a folder several hundreds, or even thousands of files with names like "640info.txt", "important(12).doc", "mp312.rar", "confer64.avi", "d12.zip" it will be needed days, or even weeks and months to understand, what is what, rename all and move all in folders, according to content.

A whole directories are deleted, cause there is no possibility to find out, what is inside and use such content.

You are in the danger! Is any solvation of such heavy situation? Yes, and it is - PowerSorter.
